#### ABOUT LOCK JAW LADDER GRIP

Lock Jaw Ladder Grip is a new and innovative product which assists in securing ladders to gutters. It is designed to increase the safety of persons who use ladders and assist in meeting increasingly strict legal requirements associated with ladder use.

Lock Jaw Ladder Grip contains an adjustable locking jaw allowing it to be secured to a range of different gutter types. In addition there are adjustment mechanisms which allow the device to be utilised on a wide variety of single and extension ladders.

#### EASY AND QUICK TO FASTEN AND REMOVE

Once a ladder has been climbed the Lock Jaw Ladder Grip can be clamped onto or removed from guttering in approximately 5 seconds.
